

BOBBY JINDAL
GOVERNOR

KRISTY H. NICHOLS
COMMISSIONER OF ADMINISTRATION

State of Louisiana
Division of Administration
Office of State Procurement

July 21, 2015

ADDENDUM NO. 02

Your reference is directed to File Number V 43216 FD, Solicitation Number 2259765 for the Request for Proposal for Lease of Data Processing Hardware, which is scheduled to open at 10:00 A.M. (CT) on August 4, 2015.

The following changes are to be made to the referenced solicitation:

The proposer's written inquiries received by the inquiry deadline date of July 9, 2015 and the state's responses are included on the attached page numbers 2 - 12.

THIS ADDENDUM IS HEREBY OFFICIALLY MADE A PART OF THE REFERENCED PROPOSAL.

By: Felicia M. Sonnier, CPPB
Assistant Director of the Office of State Procurement
Telephone No. 225-342-8029
Email: felicia.sonnier@la.gov

WRITTEN INQUIRIES
RFP FOR LEASE OF DATA PROCESSING HARDWARE
FILE NUMBER: V 43216 FD; SOLICITATION NUMBER 2259765

1. **Question:** The RFP requires qualified proposers to demonstrate their ability to equip, configure, deliver, install and maintain information technology end-user hardware. Please provide details regarding the installation scope of work, and whether installation differs between desktops and notebooks.

Response: The installation scope of work includes moving the previous equipment to a designated area (such as a storage room) at the end-user computing facility, unpacking the configured hardware that the Contractor has delivered to the end-user computing facility, moving the equipment within the facility to the desired location, setting up the equipment at that location, and powering up the equipment to verify that its configuration meets the specifications outlined in the lease agreement. There are no installation requirement differences between desktops and notebooks.

2. **Question:** Please define what the State expects to receive regarding maintenance of the equipment. Will this be standard warranty / maintenance or something additional? If non-standard and / or additional, please provide details.

Response: The State's expectation for maintenance is the standard warranty / maintenance on desktop equipment, as provided by manufacturer, and a complete care coverage warranty on all laptops, for a period equivalent to the lease term.

3. **Question:** Laptop specifications call for a 9-cell battery. Is there an alternative that can be used as long as battery life is up to "X" amount of time? If so, what is the battery life required?

Response: The State will not accept any alternatives for the 9-cell battery specification for the laptops in an RFP proposal. Please note that these specifications are for evaluation purposes only and the State may consider alternatives to this requirement for lease opportunities presented to awarded contractors in the future.

4. **Question:** Does the State have a Microsoft agreement that allows the State to load any operating system on the hardware, as long as the operating system is purchased with the hardware?

Response: The State will be entering into an agreement with Microsoft that will allow for the upgrading of any OEM purchased operating system to the most current version of Windows Enterprise edition.

5. Data security:

(a) Question: Due to data protection / security requirements of section 1.53 (Information Security Requirements) and Attachment III (Information Security Requirements), will the State retain all hard drives at the end of each lease?

Response: The State expects the Contractor to sanitize leased hardware and electronic media in accordance with the State's Data Sanitization Policy and NIST SP 800-88r1, which can be accessed at the following links:

- http://doa.louisiana.gov/ots/infosec/ots_info_security.htm
- <http://nvlpubs.nist.gov/nistpubs/SpecialPublications/NIST.SP.800-88r1.pdf>

(b) Question: Will the State allow vendors to include an option for a Defective Media Retention (DMR) Care Pack that allows the State to retain a defective hard drive replaced under warranty support?

Response: Since the State requires all leased equipment removed from State custody to be sanitized (as stated in the response to Question 5a), we do not foresee a need to retain a defective hard drive replaced under warranty support.

6. Leasing:

(a) Question: In reviewing Attachment IV – Sample Lease Contract, these terms are consistent with a vendor's performance obligations (i.e. purchase agreement). Since an industry-standard financing agreement was not included with the RFP, is the State willing to negotiate that terms / conditions of vendor's State and Local Government Master Operating Lease Agreement? Upon request, we would be glad to provide the State with a list of other States that have agreed to this Lease Agreement.

Response: The State is willing to negotiate a contract with the successful Proposer(s) in accordance with page 18, Sections 1.26 and 1.27 of the RFP. Additionally, please refer to La. R.S. 39:200(F) with respect to the use of preprinted forms.

(b) Question: Will the State consider lease pricing to include Personal Property Tax (PPT), Pack and Ship (PASS), and, due to security issues, price any computer to be returned without the Hard Drive Disk (HDD)? We would be glad to provide these as separate line items, as well as included in the total lease cost.

Response: The State will consider lease pricing in accordance with page 33, second paragraph of Section 3.1 of the RFP and page 52, Attachment IV-Sample Lease Contract Provisions, Scope of Lease Section.

(c) Question: We would also suggest monthly payments in arrears.

Response: The State intends for Contractor to invoice for services provided in previous month and, therefore, supports Proposer's suggestion of monthly payment in arrears.

7. **Question:** How many total state offices are there to be served in the 64 parishes?

Response: 532.

8. **Question:** Can you provide the total quantity of each standard laptop, premium laptop, standard desktop, premium desktop, docking stations and monitor that make up the total 500 imaged devices that will be deployed by state office locations?

Response: The State supports approximately 24,000 in-scope OTS users statewide, across a number of technological configurations that will not necessarily be an indicator of future requirements. As such, the State supports end-user computing devices far exceeding the 500 imaged devices noted in this question and only provided that number in the RFP as a means of establishing its capacity expectations for parties interested in submitting proposals for this RFP.

Please note that the intent of the State in this RFP is to execute a statewide agreement with each procurement on the contract requiring a separate lease agreement.

9. **Question:** What kind of internet communications are at each office?

Response: Network connections vary by location, depending on the size of the office. Remote offices are connected with either a T1 or an Ethernet circuit to the State's backbone. Agency traffic enters and exits the headquarters at the State's two main egress points in Baton Rouge. Some very small offices may have DSL or cable internet connections and use VPN for connection back to the agency headquarters.

10. **Question:** How are the state offices being supported today?

Response: Regional technicians for each agency are assigned to provide on-site and remote support. As calls or tickets are received, they are assigned to the technician in the area to troubleshoot and resolve, or the OTS technician opens a ticket with the vendor for further resolution as needed.

11. **Question:** Does the State have a preferred hardware brand (i.e. Dell, HP, Lenovo)?

Response: No.

12. **Question:** Do the state offices have storage locations to receive and store hardware on-site prior to technician arrival?

Response: Yes.

13. **Question:** Will Proposer be responsible for removing surplus hardware from these office locations?

Response: No, but the Contractor will be responsible for moving the previous equipment to a designated area (such as a storage room) at the end-user computing facility.

14. **Question:** Are proposers responsible for user's data being backed up and restored from old hardware to new device?

Response: Yes, in a limited number of instances. A documented procedure will be provided to the Contractor, providing instructions on how to back up and restore data from the legacy hardware to the leased devices.

15. **Question:** Will there be proprietary applications that will need to be installed by proposer?

Response: No.

16. **Question:** Will there be a network server administrator assigned to work with proposer for login and network related technical issues that are out of scope?

Response: A network server administrator will be assigned to work with the Contractor for login and network-related technical issues.

17. **Question:** Referencing 1.2 Definitions (Page 6 of 64) and 1.36 Assignment (Page 25 of 64), a Contractor is a completely separate entity than a Lessor. A Lessor can be tied to a specific Contractor but allowed to finance other Contractor's product lines. Assignment needs to be allowable because it gives the Contractor and the Lessor the ability to regulate their specific requirements accurately. Will the State please update the RFP to allow for assignment with notice (but without prior written consent), and define the difference between a Contractor and a Lessor?

Response: The definition of "Contractor" on page 6, section 1.2 (C) of the RFP is supplemented and amended as follows:

Contractor – Any person having a contract with a governmental body. For sections of this RFP outlining required actions of a Contractor, the Contractor refers to the Successful Proposer responding to this RFP, the Lessor under any purchase order issued in connection with the RFP awarded Contract, and/or any assignee of any Contract or purchase order issued in connection with this RFP. The successful Proposer shall be a Lessor under the contract.

With respect to Assignments, see page 24, Section 1.35 of the RFP and additionally, please note La. R.S. 39:197(19).

18. **Question:** Referencing 1.27 Contract Award and Negotiation (Page 18 of 64), when the contract is close to finalization and it is the mutual interest of the parties to continue contract negotiations beyond 30 days, how many additional days would the State agree to stretch the initial 30 day negotiation term?

Response: In accordance with Section 1.27 of the RFP, the State may elect to continue to negotiate with the successful Proposer beyond thirty (30) days.

19. **Question:** Referencing 1.35 Termination (Page 24 of 64), the termination clauses are a combination of Lessor requirements and Contractor requirements. Termination for Non-Appropriation of Funds would be tied to the Lessor. Termination for Cause and Convenience are Contractor focused. Which termination terms that clearly define and separate the Contractor and the Lessor is the State willing to negotiate?

Response: Please refer to the revised definition of “Contractor” in the response to Question 17.

20. **Question:** Referencing 1.37 No Guarantee of Quantity (Page 25 of 64), technology updates and issuances of new models of technology cause a price fluctuation in the market. Equipment and lease quotes are for an exact amount of time and clearly stated on the quote. Once the State has issued a PO for a specific order, the price is locked in for that order for the term of the lease. Will the State please restate the above to reflect that the per unit price may vary based in technology updates and new model availability?

Response: The State acknowledges that price fluctuations within the market may result in a Contractor providing quotes in different amounts for identical configurations over time. In other words, the State acknowledges that the Contractor may provide a quote for one configuration in response to one State lease opportunity and then may provide a different quote for an identical configuration in response to another State lease opportunity a few months later.

21. **Question:** Referencing Attachment I Equipment Specifications (starting on Page 37 of 64), does the State plan to adjust the list of items during the term of the contract to include Tablets?

Response: The State considers this RFP and its resulting contracts to be mechanisms through which any type of end-user hardware could potentially be leased, including tablets.

22. **Question:** Referencing Attachment IV Sample Lease Contract Provisions (starting on Page 50 of 64), many of the terms and conditions in the RFP are manufacturer requirements and not requirements that pertain to a Lessor. Are you willing to entertain a Lessor’s Master Lease agreement, or is it mandatory to start negotiations with the State’s terms?

Response: It is mandatory to start negotiations with the State’s terms. For applicable references, please refer to the response for Question 6a.

23. **Question:** Referencing Section 1.1.1 Purpose (starting on Page 5 of 64), Will the deployments be over a 5-year period or will they take place over the first couple of months of the contract?

Response: Deployments will take place according to the conditions set forth in lease agreement between the State and Contractor. The State anticipates deployment of end user equipment will normally be required within the first few months of the lease agreement.

24. Question: How many total devices?

Response: Please refer to the response for Question 8.

25. Question: Please provide a site list with address of each location and how many units to be installed at each location.

Response: Lease opportunities provided to the Contractors will contain the service address and number of units required at those addresses.

26. Question: Please confirm that references to “Maintenance of Configured Equipment” refer to standard manufacturer warranties and break / fix service provided with the system.

Response: Confirmed.

27. Question: Warehousing and Logistics - Do you need Warehousing or can the vendor ship equipment directly to each location and store it there until deployment?

Response: The Contractor may ship equipment directly to each location and store it there for a short period of time, until deployment.

28. Question: Imaging - How is imaging currently installed? Servers, DVD, USB, other?

Response: Images are deployed with either USB, Microsoft Deployment Toolkit, Microsoft SCCM or Absolute Manage.

29. Question: How many different images will you have?

Response: Currently, we have approximately 32 images.

30. Question: How large are the images?

Response: 12 GB.

31. Question: Do the images have any special requirements, such as naming conventions, special BIOS settings, etc.?

Response: The State employs standard computer naming convention and Enable VPro.

32. Question: If at a staging area, can you please provide size and location of the staging area, as well as network availability and power outlets?

Response: There are two (2) staging areas in the Baton Rouge area that have the network and power capacity to accommodate 40 devices at a time.

33. Question: Application loads - Will end users need to have applications loaded?

Response: The State intends to include the majority of end-user applications in the images, but there could be a limited number of instances where additional applications may need to be loaded according to instructions provided by the State.

34. Question: What is the process / tool used to load applications?

Response: Automated package deployment, using Microsoft SCCM or Absolute Manage.

35. Question: How many applications per end users?

Response: The number of applications per end-user will vary.

36. Question: How long does it take to load applications in your environment?

Response: The duration of time it takes to load applications in our environments will vary.

37. Question: Data Migration - Will end users need data migration? If so:

Response: Yes.

(a) Question: If so, What tool processes does customer use?

Response: Folder Redirection; Windows User System State Migration; Windows Easy Transfer.

(b) Question: How long does customer process take?

Response: 30 minutes.

(c) Question: How is it done: network, peer to peer, or USB?

Response: Network; USB.

(d) Question: How much GB on average per end user?

Response: 15 GB.

(e) Question: Are customer's drives encrypted?

Response: Some are encrypted.

(f) Question: What encryption tool is used?

Response: Bitlocker.

(g) Question: Do drives need to be de-encrypted?

Response: No.

38. **Question:** Basic Installation - Please describe the physical installation environment. Will systems be installed onto desks, monitor stands, WOW carts, or other special surface?

Response: User desks.

39. **Question:** How many existing peripherals will need to be added to the CPU?

Response: One (1).

40. **Question:** Can we use customer dumpsters for trash or does trash need to be taken off-site?

Response: Trash needs to be taken offsite.

41. **Question:** Does the State desire de-installation of legacy systems? If so, what does the vendor need to do with them? Send back to customer's main site, warehouse for customer, recycling for customer, or other?

Response: No, the State does not desire de-installation of legacy systems.

42. **Question:** Does customer need Quarantine time? If so, how long?

Response: No. For any legacy equipment removed by Contractor, Contractor is only responsible for moving equipment to a designated area at the end-user computing facility (such as a storage room). For any leased equipment that is removed by Contractor either during the term of or at the end of the lease period, Contractor will be responsible for adhering to the State's data protection / information security requirements noted in the response to Question 5a.

43. **Question:** Is transportation of legacy equipment from remote sites back to a customer main site needed?

Response: No.

44. **Question:** Is Hard Drive removal required?

Response: No.

45. **Question:** Asset Tagging - If asset tagging is needed, will the asset tag be customer or vendor-supplied?

Response: Customer supplied.

46. **Question:** If customer-supplied, please provide a sample of the required asset tag.

Response: A sample of the asset tag will be provided to Contractor after contract execution.

47. **Questions:** Within regards to Termination for Cause and Termination for Convenience, will there be a distinction between terms applicable to Supplier vs. Third Party Leasing?

Response: Any contract issued under this RFP will be subject to the Termination for Cause and Termination for Convenience provisions contained in the primary lease or any applicable purchase order.

48. **Question:** Within regards to purchase orders acting as leases, will we be able to present standard lease documentation? If we use a standard lease agreement, will that lease agreement control the overall terms and conditions of the RFP? If we cannot use a standard lease agreement, can we insert additional lease terms into the Sample Lease Contract Provisions?

Response: Please refer to the response for Question 6a.

49. **Question:** Can we add additional lease documents as required by our business?

Response: Please refer to the response for Question 6a.

50. **Question:** Can you please provide a list of the locations for the equipment to be returned from (pack and ship requirement)?

Response: Please refer to Attachment A of this Addendum No. 01 for a list of sites and physical addresses.

51. **Question:** Do you want to own the equipment at the end of the lease or have the option to return the equipment, keep some of all of the equipment at end of lease? We can allow for partial buyouts and like for like substitutions at end of lease.

Response: The State prefers, but does not require, having the option to own all or part of the leased hardware at the end of the lease period.

52. **Question:** Do you prefer electronic invoices or paper?

Response: The State has no preference between electronic or paper invoices and will accept either.

53. **Question:** In regards to Section II HIPAA Security Requirements, Contractor, in the performance of service will not host, transmit, receive, or maintain PHI. Therefore, do you agree that signing a BAA is not applicable?

Response: In that Contractors performing hardware support or maintenance for actively used State devices will be operationally exposed to Restricted Data, the Contractors must comply with regulatory requirements, such as BAA.

54. Question: How many locations will the stated 500 devices be deployed to?

Response: Please refer to the response to Question Number 8 for an explanation regarding the “stated 500 devices”.

Regarding the locations leased devices may be deployed to, the State may enter into a lease agreement with the Contractor requiring deployment to any of the end-user computing facilities listed in Attachment A of this Addendum No. 01.

55. Question: What are the plans for the old systems?

Response: The State intends to re-purpose or surplus the old systems.

56. Question: Does the state have an asset recovery / disposal plan?

Response: Yes, please refer to the response for Question 5a.

57. Question: Will the State consider alternate processors, such as AMD?

Response: The State will not accept any alternatives for the processor specification in an RFP proposal. Please note that these specifications are for evaluation purposes only and the State may consider alternatives to this requirement for lease opportunities presented to awarded contractors in the future.

58. Question: Does the State want devices imaged from the OEM factory or onsite at the agency locations?

Response: OEM factory.

59. Question: How many devices will be refreshed during the contract term?

Response: The number of devices to be refreshed during the contract term depends upon the needs of the agencies supported by the Office of Technology Services.

60. Question: What is the warranty coverage period the State would like the devices to have?

Response: The State would like the devices to have a warranty coverage period equivalent to the lease term.

61. Question: How many devices will be refreshed over the contract period?

Response: Please refer to the response for Question 59.

62. Question: What type of industry certifications will the State require from the Contractor?
Example: ISO 9001, ISO 14001, ISO 14064-1.

Response: The State prefers Contractor to receive an annual SSAE16 SOC 2 Type 2 audit. Please note, if the Contractor must take custody of a production leased device in order to service, support or repair the device, the State will expect formal documented processes that may be audited at any time.

63. Question: What type of Computrace is required and for how many years?

Response: Absolute Computrace is required on all mobile devices for the length of the lease term.

64. Question: Wireless card requested was ABGN; will AC Dual band suffice?

Response: The State will not accept any alternatives for the wireless card specification in an RFP proposal. Please note that these specifications are for evaluation purposes only and the State may consider alternatives to this requirement for lease opportunities presented to awarded contractors in the future.

65. Question: Will a 15" display be acceptable for the State in regards to the Premium laptop specifications?

Response: The State will not accept any alternatives for the display specification in an RFP proposal. Please note that these specifications are for evaluation purposes only and the State may consider alternatives to this requirement for lease opportunities presented to awarded contractors in the future.
